Vista Screen	R61	4	0.020 in	36% Fiberglass / 64% Vinyl	B	✓	1, 2 & 3

Care Method 1

Dusting with a feather, or synthetic, non-abrasive, material duster is recommended for all Roller Shade surfaces which are lightly soiled.

Care Method 2

Wiping with a soft, damp sponge or cloth, made of non-abrasive material, with lukewarm water is recommended for all Roller Shade surfaces which are vinyl or mylar.

Care Method 3

Vacuuming with a soft bristle vacuum cleaner brush attachment is recommended for Roller Shade surfaces which are heavily soiled.

A. Glare Reducing

Softly filters light and reduces glare. Images, shapes and people can be seen clearly. Provides the least amount of light and shape screening.

B. Filtering

Filters strong light. Images, shapes and people can be seen with some clarity. Provides a modest degree of light and shape screening.

C. Shading

Significantly reduces light. Images, shapes and people cannot be seen clearly. Provides a moderate to strong degree of light and shape screening.

D. Blocking

Dramatically reduces light. Images, shapes and people are not distinguishable. Provides privacy against most all direct light and shape screening (except minimal light that may seep through closed or overlapping opaque/blackout vanes).

E. Blackout

Blocks out virtually all light (except light that may enter on the sides of the shade) for maximum privacy and darkness.
